## **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Methods for Manufacturing a Tape and a Smartcard.

### ***Claim Objections***

2. Reference characters have not been consistently used throughout the claims. It is suggested that the reference characters be used consistently throughout the claims or that the reference characters be removed altogether in the claims.

Appropriate correction or clarification is required.

### ***Allowable Subject Matter***

3. Claims 1-5 are allowable over prior art.
4. The following is a statement of reasons for the indication of allowable subject matter: although the prior art of record teach a winded glued tape in which elements, particularly semiconductor devices, are glued to the tape, the prior art of record fails to teach or fairly suggest either alone or in combination thereof,

Art Unit: 2876

regarding independent claim 1, a method of manufacturing a tape to which a plurality of elements are affixed by means of a glue in a solid state, the method including a gluing step in which elements are glued to a basic tape, the method characterized in that the gluing step is followed by:

a winding step in which the glued tape is wound while the glue is in a state between a liquid state and the solid state so as to obtain a winded glued tape; and

a heating step in which the winded glued tape is heated so that the glue reaches the solid state; and

regarding independent claim 5, a method of manufacturing a smart card, characterized in that the method includes the following steps:

a winding step in which a glued tape is wound while a glue is in a state between a liquid state and a solid state, so as to obtain a winded glued tape; and

a heating step in which the winded glued tape is heated so that the glue reaches the solid state.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Liang et al. (US 7,056,767) teach a method and apparatus for flip chip device assembly by radiant heating.

Art Unit: 2876

Yamazaki et al. (US 6,924,211) and Yamazaki et al. (US 6,753,614) teach a semiconductor chip carrying adhesive tape/sheet, semiconductor chip carrier, semiconductor chip mounting method and semiconductor chip packaging body.

Haghiri-Tehrani (US 5,055,913) teach a terminal arrangement for integrated circuit device.

6. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
